Global Telemedicine and eHealth Updates: Knowledge Resources

Vol. 4, 2011

Editors

Malina Jordanova and Frank Lievens

ISfTeH
International Society for Telemedicine & eHealth
Preface

The fourth volume of the series “Global Telemedicine and eHealth Updates: Knowledge Resources”, is now in your hands.

With 133 papers from 47 countries, the book presents a collective experience of experts from different continents all over the world. Papers reveal various national and cultural points of view on how to develop and implement Telemedicine/eHealth solutions for the treatment of patients and wellbeing of citizens.

Year after year the series “Global Telemedicine and eHealth Updates: Knowledge Resources” provides a glimpse and summarizes the most recent practical achievements, existing solutions and experiences in the area of Telemedicine/eHealth.

Brought to life by contemporary changes of our world, Telemedicine/eHealth offers enormous possibilities. The technological solutions are available and ready to be implemented in healthcare systems. Telemedicine/eHealth services are advancing and acceptable to both patients and medical professionals. If carefully implemented, taking into account the needs of the community, Telemedicine/eHealth is able to improve both access to and the standard of healthcare, and thus to close the gap between the demand for affordable, high quality healthcare to everyone, at any time, everywhere, and the necessity to stop the increase in healthcare budgets worldwide.

Telemedicine/eHealth is already a must, a fantastic challenge for the future, but it must be based on cooperation and coordination at all possible levels. It requires networking and planning, readiness to learn from others, and avoiding re-inventing the wheel. The main challenge is to be sure that available options are used optimally and in a coordinated manner as to ascertain that the desired effects do come true and the resources are indeed not diverted away from basic needs.

We are convinced that this book will provide useful information to those who are preparing to introduce Telemedicine/eHealth in their regions or countries. It will allow them to rely on the experience of others and will make them aware of the benefits and problems that were encountered during and after implementation of systems or services, and as such help them to avoid mistakes and reduce potential problems.

Yet, it is necessary to underline that:

- The content of the book is divided in chapters covering various areas of eHealth;
• Chapters and papers in each chapter are listed alphabetically;
• The original style of the authors was respected as much as possible;
• In the content, after the title of papers a maximum of 3 to 4 co-authors are listed, while the rest are marked as “et al”;
• “How”, “Where”, “When” and especially “How Much” – are only part of the questions that authors are trying to answer.

We hope that everyone involved in Telemedicine/eHealth will find this book not only interesting, but most valuable as well.

Enjoy your reading!

Editors

Malina Jordanova, MD, PhD
Educational Program Coordinator, Med-e-Tel
Space and Solar-Terrestrial Research Institute, Bulgarian Academy of Sciences
Bulgaria

Frank Lievens
Director, Med-e-Tel
Board Member, Secretary and Treasurer of International Society for Telemedicine & eHealth (ISfTeH)
Belgium & Switzerland

Editors gratefully acknowledge the work of all reviewers that dedicated lots of efforts, time and high expertise, and with their valuable advises, supported both authors and editors in the process of selecting, correcting and preparing for publication all papers included in this book.
Content

Preface ii

Benefits of Free/Libre Open Source Software in Health Care (FLOSS-HC) 1

AAL Open Association Manifesto 2
F. Furfari, F. Potortì, S. Chessa et al.

Android/OpenMRS: Integrating EMRS and Decision Logic Functionality within Mobile Applications for Healthcare Workers 8
T. Routen

Debian Med: Integrated Software Environment for All Medical Purposes Based on Debian GNU/Linux 12
A. Tille, S. Möller, M. Hanke, Y. Halchenko

Improving Health Technology Management through an Internet Based Mobile Wireless Health Care Portal with a Web Questionnaire Processing System 15
V. Aghasonu, A. Ogini, U. Nnodum

Open Health Assistant Platform and Innovative Business Models for Open Source 19
J. M. López de la Fuente

Open Source Software and Linked Open Data Synergy Illustrated by Two Medical Applications 25
N. Matskanis, J. Roumier, F. Lawarrée, F. Estiévenart, R. Bendaoud

Open Standards ICT as Interoperability Elements in Health Care Area 30
K. Frączkowski, A. Zwiefka

Teletrauma Procedures and Information Flow in a Regional Telemedical Network 37
M. Kosiedowski, B. Mankowski, C. Mazurek et al.

universAAL – An Open Platform and Reference Specification for Ambient Assisted Living 42
S. Hanke, V. Eisenberg, M. R. Tazari et al.

Cost Effectiveness of Telehealth Solutions 47

A Business Case For European Early Genetic Testing Using an Adaptive Knowledge Platform in Translation Medicine 48
C. Huttin, M. Liebman

A Framework for the Assessment of Teleradiology in South Africa: An Eastern Cape Case Study 50
C. Haumann, L. van Dyk, J. B. Fortuin
A Multi-Dimensional Visual Map for the Measurement and Comparison of Telemedicine Systems
L. van Dyk, J. Fortuin, A. J. Van Zyl
An Economic Framework for the Use of Telehealth Systems in the Diagnosis and Treatment of Autism Spectrum Disorders
F. Angjellari-Dajci, M. E. Stachura, F. Goldstein et al.
Analysis of Business Models Use Cases for eHealth in Europe and in Japan
A. Schiltz, P. Rouille, P. Genestier et al.
Cost-Benefit Analysis of Tele-speech-language Therapy
A. Hosokawa
Cost-Effectiveness of a Telepsychiatric Service Delivery to Autistic Children
F. Angjellari-Dajci, F. Goldstein, W. F. Lawless
Early Evaluation of Emergency Telemedicine Consultation Cost in Ubonratchathani Province, Thailand
W. Phonburee, P. Suwaratchai, S. Techatanachai
eHealth Consulting Life Cycle: A Reference Model with Practical Relevance Taking Into Account Service Quality and Cost
C. H. Timwo Monthe
Formulation of a Model to Develop Telehealth Actions Allowing Comparison between Countries: The Situation in Latin America
A. F. Santos, A. E. Haddad, C. L Wen et al.
Home Automation and ICT Solutions Applied to Furniture to Facilitate Use and Assist People with Reduced Autonomy
M. Devilleger, A. Fortin, T. Maitre et al.
Operational Costs in a Large Scale Telehealth Service
Success Factors for Telehealth Service Implementation
M. B. Alkmim, M. C. Nunes, J. C. Jesus et al.
Technical Impact of eHealth: A Business Case Ensues
J. S. Bhatia, S. Sharma, C. Singh
The Role of Telepsychiatry in the Rural Settings of SE Cyclades: Providing Cost-Effective Services with a De-Stigmatizing Approach
D. Garoni, D. Sarantidis, H. Bekiari, K. Katsadoros

Distance Consultations and Chronic Disease Management
A New Challenge for Sanoia.com: Orphan Diseases
L. Chiche, A. Brescianini, J. M. Durand et al.
Affordable Location Based Services (LBS) to Assist Alzheimer’s Disease Patients
G. Bestente, A. Frisiello, F. Scullino et al.

Applications of Tactile Interfaces to Home Automation for People in Loss of Autonomy: Training for Memory Gestures
B. Bourdillon, L. Parizot, J. Vincent et al.

Compare Psychiatric Consultation Face-To-Face and Telepsychiatry
M. Stojakovic

Effective Telemedicine Consultation on the Treatment of Hypertension
T. Harju, M. Syvänne, M. Laine

IM28, a Complex Molecular Inhibition of HIV Replication and Cardiovascular Risk Reduction
M. Donatien

National Organ Information System (NOIS) of Turkey
U. Hulur, A.K. Caylan, S. Ekinci

On The Use of the Automobile Code of Colors in the Housing Environment Context for Persons in Loss of Autonomy
M. Delvigne, A. Santos, A. Tardot et al.

Reproducibility of Structural Light Assessment 3D Posture Telediagnostic: Preliminary Reliability Study
W. M. Glinkowski, M. Kabacyj, A. Śliwka et al.

Supervision System of an Experimental Apartment for Evaluating Risk and Improving Safety of Persons in Loss of Autonomy
F. Daudy, B. Michaudet, E. Peyrot et al.

Telemedicine for Critical Patients during Transfer in Ubonratchathani, Thailand
M. Viwathanasittiphong, V. Mungmai, S. Louyhai et al.

The Malaysian Ministry of Health Teleconsultation Experience
S. Singh

The Potential Socio-Economic Impact of Using Telehealth Technologies for Diagnosis and Management of Autism Spectrum Disorders (ASDs): A Case Study Progress Report
F. Angjellari-Dajci, E. Astapova, C. DiBattisto et al.

eHealth Applications in Psychiatry, Occupational Therapy and Rehabilitation

Help4Mood – Distributed System to Support Treatment of Patients with Major Depression
J. C. Castro, J. Benseny, J. M. Colomé, J. Martínez-Miranda

Hypertext: Young Adult Implementation of Social Media to
Communicate, Preserve and Project Self

K. C. Holmes, G. Moroney, E. Holder

Implementation of Virtual Reality Program “Emotion 1.0” to the Study of Theory of Mind in Children in Primary Education

J. F. López-Paz, I. Amayra Caro, E. Lázaro Pérez

Key Aspects, Efficacy and Best Practices for Online Suicide Intervention Training

P. Quinnett, M. F. Davis

Lifestyles and Behaviors: Social Urgency of the Prevention of Health and Sustainability of National Health Systems: The Need for Telemedicine

A. Giannone, P. P. Visentin

Monitoring, Treatment and Prediction of Bipolar Disorder Episodes

MONARCA

V. Osmani, O. Mayora

The Influence of Preoperative Physiotherapy on the Willingness to Participate Internet Based Remote Home Rehabilitation among Patients Suffering Coxarthrosis

A. Kostrubala, W. Glinkowski, D. Cabaj et al.
