Global Telemedicine and eHealth Updates: Knowledge Resources

Vol. 5, 2012

Editors

Malina Jordanova and Frank Lievens

ISfTeH
International Society for Telemedicine & eHealth
Preface

The fifth volume of the series “Global Telemedicine and eHealth Updates: Knowledge Resources”, is now in your hands.

With 144 papers from 50 countries, the book presents a collective experience of experts from different continents all over the world. Papers reveal various national and cultural points of view on how to develop and implement Telemedicine/eHealth solutions for the treatment of patients and wellbeing of citizens.

Year after year the series “Global Telemedicine and eHealth Updates: Knowledge Resources” provide a glimpse and summarize the most recent practical achievements, existing solutions and experiences in the area of Telemedicine/eHealth.

Brought to life by contemporary changes of our world, Telemedicine/eHealth offers enormous possibilities. The technological solutions are available and ready to be implemented in healthcare systems. If carefully implemented, taking into account the needs of the community, Telemedicine/eHealth is able to improve both access to and the standard of healthcare, and thus to close the gap between the demand for affordable, high quality healthcare to everyone, at any time, everywhere, and the necessity to control the increase in healthcare budgets worldwide.

Telemedicine/eHealth is already a must, a fantastic challenge for the future, but it must be based on cooperation and coordination at all possible levels. It requires networking and planning, readiness to learn from others, and avoiding re-inventing the wheel. The main challenge is to be sure that available options are used optimally and in a coordinated manner as to ascertain that the desired effects do come true and the resources are indeed not diverted away from basic needs.

We are convinced that this book will provide useful information to those who are preparing to introduce Telemedicine/eHealth in their regions or countries. It will allow them to rely on the experience of others and will make them aware of the benefits and problems that were encountered during and after implementation of systems or services, and as such help them to avoid mistakes and reduce potential problems.

Yet, it is necessary to underline that:

- The content of the book is divided in chapters covering various areas of eHealth;
- Chapters and papers in each chapter are listed alphabetically;
• The original style of the authors was respected as much as possible;
• In the content, after the title of papers a maximum of 3 to 4 co-authors are listed, while the rest are marked as “et al”;
• “How”, “Where”, “When” and especially “How Much” – are only part of the questions that authors are trying to answer.

We hope that everyone involved in Telemedicine/eHealth will find this book not only interesting, but most valuable as well.

Enjoy your reading!

Editors

Malina Jordanova, MD, PhD
Educational Program Coordinator, Med-e-Tel
Space Research & Technology Institute, Bulgarian Academy of Sciences
Bulgaria

Frank Lievens
Director, Med-e-Tel
Board Member, Secretary and Treasurer of International Society for Telemedicine & eHealth (ISfTeH)
Belgium & Switzerland

Editors gratefully acknowledge the work of all reviewers that dedicated lots of efforts, time and high expertise, and with their valuable advice, supported both authors and editors in the process of selecting, correcting and preparing for publication all papers included in this book.
Content

Preface ii

Benefits of Free/Libre Open Source Software in Health Care (FLOSS-HC) 1

Creation of an Integral Distributed Teleophthalmology System
D. Garcia-Morate, I. Miranda-Diez, J. Tovar et al. 2

Embracing eHealth: Free and Open source (FLOSS) Opportunities in Kenya
S. M. Kiura, P. Ontunya 7

How to Make Use of a Wiki for Knowledge and Information Management in an Imaging Department
V. Lapczynski 12

MECES (www.diagnomx.eu) – An Open Access, Secure, And Multilingual Medical Communication System
K. Kayser, S. Borkenfeld, A. Djenouni et al. 15

Moodle Report: The Cornerstone between Teaching Activities and Students' Performance
C. Kiyan, M. Zolfo, M. Mehta et al. 21

Biomedical Informatics 24

A Multi-Modal Biosignal Based Approach to Stress Detection
W. Khalifa, K. Revett, M. Roushy, A-B. M. Salem 25

Applying Machine Learning To Predict the Progression of HIV Infection Using CD4
Y. Singh, M. Mars 30

Building OBR-based OWL Ontology for Viral Hepatitis
I. F. Moawad, G. A. L. Marzoqi, A-B. M. Salem 34

Collaborative Development of Dermatovenerology Ontology
T. A.Gavrilova, R. A. Ravodin, E. S. Bolotnikova, A. V. Kotko 39

Dynamic Context Aware Access Control Model for the Areas with Shortage of Healthcare Professionals
Z. Omary, F. J. Mtenzi, B. Wu 44
Intelligent Technologies and Methodologies for Medical Knowledge Engineering
A-B. M. Salem

Machine Learning for Processing Myocardial Perfusion SPECT Images
S. H. ElRefaie, K. Revett, A-B. M. Salem

Modeling Extraction of Temporal Knowledge from Patient Records
V. C. Agbasonu; A. Ogini; U. Nnodum

Ontology-Based Knowledge Representation for Liver Cancer
M. Alfonse, M. M. Aref, A-B. M. Salem

Predicting a Single HIV Drug Resistance Measure from Three International Interpretation Gold Standards
Y. Singh, M. Mars

Software for Transfusion Laboratory Practice
P. Mihova, I. Pendzhurov, J. Vinarova, A. Timcheva

Distance Consultations, Home Care & Telemonitoring

A 3D Accelerometry - Based Fall Detection System for the Elderly: Realistic False Alarm Rate and Sensitivity
C. Soaz, C Lederer, M. Daumer

A Framework for Business Continuity Management in Home-Care Context
O. Rejeb, F. Marmier, E. Lamine et al.

AFA-ConnectAlzheimer: Telepsychology for Caregivers
J. Benavent, J. C. Castro, J. M. Colomè, I. Macanaz

Alcatel-Lucent Patient Centered Telemedicine (PCT) – Enabling real transformation in Healthcare
N. Hill, S. Ahuja

Anatomy of a Teleconsultation
J. Cinqualbre, D. Uhlrich, N. Grosse et al.

Assistive Tools for Real-Time Optimized Audits of Homes of People with Disabilities or With Loss of Autonomy
F. Mas, L. Galet, F. Bouillon et al.

Domestic Risk Prevention and Technologies: New Jobs of Tomorrow
